## **DETAILED ACTION**

### ***Response to Arguments***

1. In view of the Appeal Brief filed on May 15, 2006, PROSECUTION IS HEREBY REOPENED. New ground rejection is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) request reinstatement of the appeal.

If reinstatement of the appeal is requested, such request must be accompanied by a supplemental appeal brief, but no new amendments, affidavits (37 CFR 1.130, 1.131 or 1.132) or other evidence are permitted. See 37 CFR 1.193(b)(2).

2. Applicant's arguments, filed on May 15, 2006, with respect to the rejection(s) of claims 1-4 under 35 USC 112 second paragraph and 35 USC 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn.

However, upon further consideration, a new ground(s) of rejection is made in view of US 5,999,800.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent

Art Unit: 2611

granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Choi et al. (US 5,999,800).

- With regard claim 1, discloses a method for transmitting and demodulating a communications signal using an adaptive antenna array in a wireless communication system with

(a) estimating at least one eigenvector of a matrix of communication channel coefficients for a channel (Fig.2 step 212, column 3 lines 27-50, column 10 lines 1-65 and column 16 lines 28-50, Fig.31 step 2830 and column 32 lines 38-42) between a first plurality of antennas (Fig.11 and 30, elements 1 and 12) and a second plurality of antennas (Fig.3 and 13, elements 1 and 11); and

(b) transmitting using said first plurality of antennas with relative weightings of baseband signals on said first plurality of antennas corresponding to components of said at least one eigenvector (Fig.30, Fig.31 step 2830, and column 32 lines 38-42)..

***Allowable Subject Matter***

5. Claims 5-12 are allowed.

6. Claims 2-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten to overcome the objection(s) set forth in this Office action

and rewritten in independent form including all of the limitations of the base claim and any intervening claims.
